About Me

I'm a full stack software developer, mainly oriented to web applications, with knowledge in technologies such as React and Angular. Also, I'm a university student, holder of an excellence scholarship at Universidad Cenfotec and a believer in the spreading of science and education. I'm focused on maintaining good practices and promoting the continuous improvement of the software in which I work on. With high attention to detail, I'm looking forward to taking care of the craftsmanship in coding.

Profesional Experience

Mar 2022 - Nov 2022
- **Full Stack Software Engineer - MobyDyg**
  Created responsive ecommerce web portals using Angular framework with Typescript, AWS, MySQL, and GitHub as VCS. Worked in team and pair programming.

Oct 2021 - Jan 2022
- **Software Engineer Intern - 3Pillar Global**
  Prototyped mockups in Figma for a responsive web application and brought them to live using React.js, C#, ASP .NET MVC, SQL Server and GitHub. Team-mate and pair programmed.

Educational Background

Jan 2022 - Today
- **Bachelor of Software Engineering**
  Universidad Cenfotec

Feb 2019 - Dec 2021
- **Software Development High School Level Technician**
  Don Bosco Professional Technical High School

Feb 2016 - Dec 2021
- **High School Education**
  Don Bosco Professional Technical High School

Extracurricular Activities

Apr 2020 - Dec 2021
- **SKEM Club**
  I created graphic material for campaigns and projects, and helped plan the SKEM Club reactivation campaign for 2021, the first national innovation club in high school education in Costa Rica. I and other members of the team were in charge of generating delivery dates, schedules and publicity for the club's social networks.

Skills

- **Tech**

Adobe Illustrator	Figma	Microsoft SQL
Angular	GitHub	Node JS
AWS	HTML5	React JS
CSS3	JavaScript	TypeScript

- **Soft**

Analytical	Creative	Meticulous
Teamplayer	Empathetic	Innovative

- **Languages**

Spanish	*Native*
English	*TOEIC B2 Listening and Reading Test*

Projects

Feb 2022 - Today
- **Horus - Universidad Cenfotec**
  Currently, I am developing a vehicle license plate recognition system for Universidad Cenfotec, learning about neural networks and computer vision with Python.

Feb 2019 - Oct 2019
- **Wonder - Expotec**
  Winning project at the Expotec fair. Wonder is a video game with the goal of educating children about social and environmental problems.

Awards and Achievements

Jan 2022
- **100% Excelence Scholarship - Cenfotec University**
  Currently, I am studying at Universidad Cenfotec thanks to a 100% excellence scholarship.

Oct 2019
- **Wonder - Expotec 2019**
  - Second place in Software Development at Don Bosco Professional Technical High School.
  - Winner of the best project in the art category at Don Bosco Professional Technical High School
  - Special recognition in software development.
  - Recognition of Isthmus of Costa Rica for a proposal to solve current problems such as global warming.
